

FOR IMMEDIATE RELEASE:

June 26th, 2008

US Amines Announces Price Increases for Its Amines Product Lines

Mobile, Alabama – US Amines Limited, a world leader in the production of alkyl and allyl amines, will increase list and off-list selling prices for some products in its amines product line, as follows below. These increases will be effective July 1, 2008, or as contracts allow.

North American price increases are as follows:

Mono iso propyl amine and solutions (MIPA)	+ \$ 0.10 per pound
Propylamines (mono - Di & Tri)	+ \$ 0.10 per pound
Cyclohexylamine	+ \$ 0.15 per pound
Allyl amines (mono - Di & Tri)	+ \$ 0.15 per pound

These price increases are necessary to keep in touch with the extra ordinary increases the industry has incurred in the last quarter. Continued price increases on raw materials, energy and freight costs have affected margins dramatically. US Amines will continue to work with our raw material providers to try and manage the costs increases as effectively as possible.

We thank you for your continued support and understanding as we manage the extraordinary circumstances in our chemical industry.
